SILPP40

Silverado Ultrasonic Leak Detector

Features

- This Wand Style Ultrasonic Leak Detector makes leak detection affordable and fast.
- Simple and effective way to locate water, air or dust leaks
- This unit finds leaks fast and accurately from inside or outside the vehicle
- Set Includes Adjustable Headphones
- Place the transmitter into the vehicle, running the receiver over the suspected area, and
- finding the leak.
- Ultrasonic leak detectors work by transmitting sound waves that are not detectable to the human
- ear. You then put the headphones on and turn on the receiver that can hear the sound waves
- coming through the opening.
- With the headset in place, you will hear a clicking sound which increases when a leak is detected
- The sound waves will not go through glass, rubber or metal so in order to pinpoint the leak, listen
- for the receiver tone to register louder and softer.
- Besides the audible sound, you can also watch as the green (on) light turns to red when it
- detects a leak in the vehicle.
- Flexible power system allows you to power it on 9, 12 or 24 volts.
